

Product Stewardship Information Sheet

'Advanced' Polypropylene Homopolymer

Product Manufacturer:

This product is manufactured by Advanced Petrochemical Company ('Advanced'), KSA

Regulation (EU) No. 10/2011: Food Contact Applications

Polypropylene Homopolymer manufactured by 'Advanced' complies with Regulation (EU) No. 10/2011 (including its amendments as of date) for food contact applications.

The product also complies with Regulation 1935/2004/EC, Restriction of use of certain epoxy derivatives 1895/2005/EC, Absence of Allergens (Regulation 1169/2011) and Absence of GMO, absence of recycled materials as per definition of Regulation 282/2008/EC.

The product also complies with Regulation 2023/2006/EC (GMP) and to the compliance 'Advanced' has standards in place such as ISO 9001:2015 which regulates production and production related activities.

The product complies with relevant requirements of Regulation EU 10/2011 (PIM) and its subsequent amendments, applicable to intermediate materials (i.e. Plastic powders, plastic granules or plastic flakes)

The monomer and additives used to produce the resin are also listed in EU Regulation No. 10/ 2011 including its amendments as of date.

Dual Use Additives:

Substances also authorized as direct food additives ("Dual use additives") are either not used for the manufacturing of this product, kind of not migrating, or only present in quantities that in case of their migration don't allow relevant contribution to exceed of the limits as set in the applicable food legislation.

Specific Migration Limit (SML) & Overall Migration Limit (OML)

This product may contain substances which have either Specific Migration Limit (SML) and/ or Total Specific Migration Limit (SML(T)) and/or QM (residual quantity) and/or a QMA (residual content per food contact surface area) as defined in Tables 1-3 of Annex I of EC 10/2011.

EU Regulation 10/ 2011 which applies to all EU Member States, specify 10 mg/dm² as the maximum overall migration from finished plastic food contact articles. OML and SML determinations are the responsibility of the manufacturer of finished plastic food contact material or article.

In accordance with EU Regulation No. 10/ 2011, the migration should be measured using the actual foodstuff or the appropriate food stimulants at the real time/temperature conditions of use, according to the rules specified in EU Directives 97/48/EC (amending 82/711/EC) and 85/572/EC.

We remind you that the users must verify that the finished items, manufactured according to good manufacturing practice, must not modify the organoleptic properties of the food.

ROHS Directives 2002/95/EC & 2011/65/EU and Commission Delegated Directive (EU) 2015/863:

The product also complies with directives 2002/95/EC & 2011/65/EU (ROHS) and the substances mentioned in the directive 2002/95/EC, 2011/65/EU (ROHS) and Commission Delegated Directive (EU) 2015/863 are not intentionally introduced and are not related to the manufacturing process of Polypropylene Homopolymer.

Waste Electrical and Electronic Equipment (WEEE) – Directive 2012/19/EU – Annex VII

The chemical substances (PCB, PCT, Hg, asbestos, CFC, HCFC, HFC, ceramic fibers, brominated flame retardants) requiring selective waste treatment are not used in the manufacture or formulation of these product. However, the product has not been tested for these chemical substances.

Directive 94/62/EC: Packaging and packing waste

The product complies with above referred Directive 94/62/EC and its amendments in force. Cadmium, chromium (VI), lead and mercury are not used in the manufacture of or the formulation of the product. The product meets the year 2001 requirements of less than 100 ppm for total incidental cadmium, chromium (VI), lead and mercury. In addition, the product has the potential to be recycled according to these requirements.

REACH Compliance & Substances of Very High Concern (SVHC):

The product complies with REACH requirements.

The substances, which are contained in the product, and require registration, also complies with REACH requirements and Substances of Very High Concern (SVHC) updated as of date. (These substances are mentioned in the following link: <https://echa.europa.eu/candidate-list-table>). The product produced by 'Advanced' does not contain a candidate listed substance at > 0.1 wt. %. Also to the best of our knowledge, none of these materials are generated during production of this product. Because we do not expect these materials to be present, we do not run any analysis on our raw materials or our finished products to measure for these materials. The substances of very high concern (SVHC) are not added intentionally during manufacturing process of this product.

FDA Compliance:

The product also complies with Food and Drug Administration (FDA), Regulation 21 CFR 177.1520 (a)(3)(i) and (c)3.2a. for Olefin Polymers. All ingredients used in the product meet the requirements of their respective FDA regulations and 21 CFR 177.1520 (b).

The product is considered as suitable for use in articles that contact food, including cooking, under conditions listed under 21 CFR 176.170c, Table 2, A through H, and can be used in contact with all types of food as listed in 21 CFR 176.170(c), Tab.1.

China Food Contact

- GB9693-1988 Standard (GMP std FCM)
- GB9693-1988 "Hygienic standard for polypropylene resin used as food packaging material": The product complies with the requirements of GB9693-1988
- GB4806.1-2016 "Food Contact Material & Articles General Safety Requirement" The product complies with relevant requirements of GB4806.1-2016 - Food Contact Material & Articles General Safety Requirement, as applicable to Plastic Resins.
- GB4806.6-2016 "National Food Safety Standard: Food Contact Resins" The base resin in the product complies with the specifications established in GB4806.6-2016, "National Food Safety Standard: Food Contact Resins, Appendix A.1, Serial Number 74, resin type: PP.
- GB9685-2016 "National Food Safety Standard: Additives for use in Food Contact Materials and Articles" The additives used in the product comply with the requirement of "GB9685-2016 National Food Safety Standard: Additives for use in Food Contact Materials and Articles" and relevant approval announcements.
- GB2760 for dual use.

This product does not contain monomers and/or additives with SML and/or Overall Migration Limit (OML). However, OML and SML determinations are the responsibility of the manufacturer of finished plastic food contact material or article.

Swiss Ordinance (SR 817.023.21):

The product also complies with Swiss Ordinance No. SR 817.023.21. This product does not contain monomers and/or additives with SML and/or Overall Migration Limit (OML). However, OML and SML determinations are the responsibility of the manufacturer of finished plastic food contact material or article.

Phthalates:

Plasticizers are not used polypropylene as Polyolefins do not require the use of plasticizers to make them soft and flexible. Those phthalate plasticizers that have been associated with potential health issues are not intentionally used by Advanced in the manufacture of or formulation of this product. However, traces of phthalates may be present in some products as impurities in the catalyst system (as minor component of catalyst system as Technical Support Agent which is in compliance with Regulation (EU) 10/2011/EC).

Declaration on California Proposition 65 (updated as on 17/11/2023):

The monomer and additives incorporated comply with California Proposition 65 (update as on 17/11/2023) and the substances listed in this proposition are not added directly or indirectly in this product.

Regulation (EC) N.1895/2005:

BADGE, NOGE and BFDGE are not used in the manufacture of or the formulation of this product according to requirement of Regulation N.1895/2005.

Regulation (EU) 2019/1021:

POPs (Persistent Organic Pollutants) substances as defined in Regulation EU 2019/1021 are not intentionally added in the manufacture of this product.

Regulation (EC) 1005/2009:

Substances that deplete the ozone layer as defined in Regulation EC 1005/2009 are not intentionally added in the manufacture of this product.

Tallow:

Tallow derived additives may be used in the manufacture of this product.

Kosher:

We do not certify our resins to be Kosher or in compliance with Kosher requirements.

Halal:

The product is not Halal certified.

European Pharmacopeia (EP):

This product has not been tested for E.P.

Drug Master File (DMF):

Information on this product is not listed in a DMF.

US Pharmacopeia (USP):

This product has not been tested for USP Class VI.

Latex:

"Natural rubber latex", "dry natural rubber", "synthetic latex" or "rubber that contains natural rubber" is not used in the manufacture of or the formulation of this product.

Polycyclic Aromatic Hydrocarbons (PAHs):

We do not intentionally use the following polycyclic aromatic hydrocarbons (PAHs) in the manufacture of or formulation of this product.

Composting - CEN Standard EN 13432:

The product is not suitable for composting.

Energy Recovery - CEN Standard EN 13431:

The calorific gain from polypropylene in an energy recovery process is 24 MJ/kg.

MOSH, MOAH & POSH

- POSH : Polyolefin Oligomeric Saturated Hydrocarbons
- MOSH: Mineral Oil Saturated Hydrocarbons
- MOAH: Mineral Oils Aromatic Hydrocarbons

Mineral oil saturated hydrocarbons (MOSH) are paraffins and naphthenes. Mineral oil aromatic hydrocarbons (MOAH) are highly alkylated mono- and/or polyaromatic hydrocarbons from mineral oil. The product does not fall under MOSH, MOAH nor POSH hydrocarbons.

Bovine Spongiform Encephalopathy (BSE)/Transmissible Spongiform Encephalopathy (TSE)"/"Mad Cow":

- Tallow derived materials used in this product compliance to the requirements of the regulations 1223/2009/EC, 1069/2009/EC and 142/2011/EC.
- The tallow derived raw materials used in these product fulfill the requirements laid down in the Note for Guidance, EMA/410/01, rev.3, part 6.4 (Tallow Derivatives).

Inventories:

All ingredients in the product are in compliance with the following chemical inventories:

United States:	Toxic Substances Control Act Inventory (TSCA)
Canada:	Domestic Substances List (DSL) – Non Domestic Substances List (NSDL)
Europe:	European Inventory of Existing Commercial Chemical Substances (EINECS) European List of Notified Chemical Substances (ELINCS)
Australia:	Australian Inventory of Chemical Substances (AICS)
Korea:	Korean Existing Chemicals List (ECL)
Japan:	Japanese Existing and New Chemical Substances (ENCS). The product is also in Compliance with Food Contact Positive Lists by Japan's Ministry of Health, Labour and Welfare (MHLW) issued on April 28th, 2020 and effective on June 1st, 2020. Table 1 and 2.
The Philippines:	Philippines Inventory of Chemicals and Chemical Substances (PICCS)
China:	Inventory of Existing Chemical Substances Manufactured or Imported in China (IECSC)
New Zealand:	New Zealand Inventory of Chemicals (NZIoC)
Taiwan:	Toxic Chemical Substance Control Act (TCSCA)

The product has no special requirements under US TSCA (e.g. consent orders, test rules, 12 (b) requirements, etc.).

MERCOSUR: (Argentina, Brazil, Uruguay, Paraguay, Venezuela and Bolivia). This product meets the requirements of following regulations:
GMC Resolution No. 03/1992 of April 1st 1992, which "establishes the general criteria and classification of materials for packaging and equipment in contact with food"

GMC Resolution No. 02/2012 of April 19th 2012 which provides a "positive list of monomers, other starting substances and polymers authorized for the manufacture of plastic packaging and equipment that come into contact with food"

The product complies with GMC Resolution No. 39/2019 and GMC Resolution No. 56/1992.

This product does not contain monomers and/or additive with SML and/or Total Specific Migration Limit (SML (T)) and/or QMA (residual content per food contact area). In order to guarantee the compliance with the above Resolutions,

the end plastic product must be analyzed by the manufacturer concerning total migration limit and such limit must be less than 50 mg/kg or 8 mg/dm².

Other no use substances:

The chemical substances listed below are not used intentionally in the manufacture or the formulation of this product and are not expected to be present. Since these products are not expected to be present, we do not carry out analysis in determining these substances.

Substance	CAS No.	Substance	CAS No.
Acenaphthylene	208-96-8	Halogenated flame retardants	-----
Acrylamide	79-06-1	GMO	-----
Acrolein (propenal)	107-02-8	Naphthalene	91-20-3

2-Mercaptobenzothiazole (Benzothiazole-2-thiol or MBT)		149-30-4	
2,4 pentadione (Acetilacetone):		123-54-6	
Endocrine Disrupters:		As reported in edilist	
		As reported in the ANSES	

Food Allergens: European Union

The food ingredients listed in the Annex II of European Directive 1169/2011/EC, are not used in the manufacture of or formulation of this product. However, this product has not been tested for these substances.

United States

Major food allergens (crustacean shellfish, eggs, fish, milk, peanuts, soy, tree nuts, and wheat) as specified in the Food Allergen Labeling and Consumer Protection Act (FALCPA) of 2004 are not used in the manufacture of or formulation of this product. However, this product has not been tested for these substances.

Biocides

The active substances listed in the Annex I of the biocidal products regulation, EU 528/2012, are not used in the manufacture of or formulation of this product. However, this product has not been tested for these chemical substances.

Coalition of Northeastern Governors (CONEG)

Cadmium, chromium (VI), lead and mercury are not used in the manufacture of or the formulation of this product. In addition, the product meets the CONEG requirements of less than 100 ppm for total incidental cadmium, chromium, lead and mercury.

Global Automotive Declarable Substance List (GADSL)

The monomer, the base resin and the additives used in the formulation of this product are not listed in the aforementioned Global Automotive Declarable Substance List. The phthalate plasticizers that have been listed in the GADSL are not intentionally used in the manufacture or formulation of these grades.

Cosmetic regulation 1223/2009/EC

The EU regulation 1223/2009/EC applies to cosmetic products and it does not apply to the polymer resins. However, we confirm that any of the substances listed in the Annex II of the regulation 1223/2009/EC is not used in the manufacture or formulation of this product. However, this product has not been tested for these chemical substances.

Dimethyl Fumarate (DMF) - EU Commission Decision 2009/251/EC

Dimethyl fumarate [2-butenedioic acid (2E)-, dimethyl ester] (DMF) (CAS#: 624-49-7) is not used in the manufacture of or formulation of these product. However, we do not test this product for DMF.

Nanomaterials

NANOMATERIALS (defined as a natural, incidental or manufactured material, containing particles, in an unbound state or as an aggregate or as an agglomerate and where, for 50 % or more of the particles in the number size distribution, one or more external dimensions is in the size range 1 nm - 100 nm.) are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances

Triclosan (2,4,4'-trichloro-2'-hydroxydiphenyl ether)-Commission Decision of 19 March 2010-(2010/169/EU)

Triclosan (2,4,4'-trichloro-2'-hydroxydiphenyl ether) Cas. N.3380-34-5 is not used in the manufacture of or formulation of this product. However, this product has not been tested for these substances.

Conflict Minerals (Dodd-Fran Wall Street Reform and Consumer Protection)

Conflict minerals, which include columbite-tantalite (also known as coltan) [source for tantalum], cassiterite [source for tin], gold, wolframite [source for tungsten] or their derivatives are not intentionally used in the manufacture of or formulation of this product. However, we do not test this product for these substances.

Switzerland "VOC-LENKUNGSABGABE"

This product contains less than 3% VOCs of the substances in the positive lists of the above Regulations.

Rhode Island Air Toxics

To the best of our knowledge, the chemicals in the list of Rhode Island Air Toxics mentioned as HAP are not used in the manufacturing or formulation of this product. However, this product has not been tested for these chemical substances.

Global Toys Regulations

CEN EN Standards, EU Directive 2005/84/EC and ASTM F963 refer to safety of toys and not specifically to plastic raw materials. According to the information provided by our raw material suppliers, we deem this product should comply with the requirements of ASTM F963, CEN standards EN71-3 / EN71-9 and EU Directive 2005/84/EC, as applicable to plastic raw materials (pellets, powder, flakes). However, this product has not been tested according to these Standards.
